Orbit & Polestar: Product Brief

New Additions to Highlighting your Floor

Orbit and Polestar are the latest additions to the already successful collection **Highlighting Your Floor** which currently consists of: Equilibrium, Menagerie, Mineral, Acceleration and Proportion.

These two new products are designed to be complimentary to one another so they can be used in tandem or alone: they also co-ordinate with and compliment all of the remainder of the **Highlighting Your Floor** collection. Through the use of colour and style any interior can be given a subtle textured and colourful look with some originality and quirkiness if desired.

Orbit demonstrates a new unique process developed by Interface which allows the creation of one whole shape, in this case a circle, which varies in size and placement on each module so that no two tiles are exactly alike. **Polestar's** textured loop construction enhances the subtle grid pattern by creating a more textural look and feel. Both patterns are designed for a monolithic installation giving the traditional feel with a modern twist.

Orbit and Polestar share the same colour line of neutrals and brights and with their plush look and feel, the striking visual aspects of the patterning, and their design flexibility, these products are ideal for the corporate office, instore and hospitality markets.

As with the rest of **Highlighting Your Floor**, there is a range of textured subtle patterns and shapes in bright and soft colours to compliment and tone with all areas of the interior. These are equally able to create a modern feel whilst conveying a sense of style, composure and certainty.

Acceleration and Proportion are complimentary in the same way, with Proportion offering a rounded rectangle within a tile, surrounded by a textured pattern but essentially plain

Acceleration.

Equilibrium gives a striking furrowed effect designed to be installed monolithic, quarter turn or ashlar giving a richness of texture to any interior.

Menagerie is a very smart plain floor finish with a subtle texture of a broken grid in a range of colours from neutrals and pale beige to darker rich colours.

To compliment and tone with this is **Mineral** which has the same broken grid pattern but with increased texture and colour variation due to different yarn effects being used.

Specifications at a Glance - Orbit and Polestar:

- 100% solution dyed nylon
- Graphlex backing
- 12 colourways
- Manufactured with 100% renewable electricity
- 50 cm x 50 cm
- Tufted pattern structured loop pile
- Monolithic installation
