# RENOVISIONS® FROM INTERFACEFLOR

*Renovisions® offers an unrivalled combination of value and skills from a single source. And, because we undertake the total responsibility for project management, the disruption to a facilities manager's already busy working day is drastically reduced.*

Renovisions® is the unique carpet renewal system from InterfaceFLOR. With no disruption to staff or their work areas, the key to Renovisions® is its simplicity.

An ingenious jacking system literally lifts up workstations right there on the spot so that the old carpet can be removed and replaced with zero disruption! Meanwhile, phones, computers and all other items of office equipment stay as they should - connected!

We work with professional flooring contractor partners to offer this service outside normal working hours.

This effectively eliminates the enormous cost of employee downtime and loss of productivity.

---

## RENOVISIONS® BENEFITS SUMMARY

---

Features	Benefits
<b>No dismantling or reassembling of furniture</b>	There is no need to employ a specialist furniture removal company. As desks and panels remain in their existing locations, there is no requirement to find storage and no risk of damage from furniture movement.
<b>No boxing or crating the contents of desks or work surfaces</b>	There is no need to employ a crate hire company. Because there is no packing or unpacking, it will not be necessary for the staff to suffer downtime. Papers, files, etc. will stay on the desks where employees left them the night before.
<b>No disconnection or reconnection of telephones, computers and electrical equipment</b>	There is no need to employ IT specialists, electricians or telephone engineers. The following morning members of staff will continue to have unimpeded access to communications equipment, etc.
<b>No disruption</b>	The enormous 'impact' costs of employee downtime and loss of productivity are eliminated.
<b>No co-ordination problems</b>	As no other trades are involved any programming complications or 'split' responsibilities are eliminated.
